Objective

I am seeking an intermediate WordPress developer role while utilizing a full-stack skillset to achieve business goals and objectives.

I've worked with WordPress since 2006 and am an expert with the CMS, having built both custom themes and plugins for the platform. My plugins have been downloaded over 5 million times and are running on approximately 440,000 websites.

Relevant Agency WordPress Experience

February 2021 - October 2021

XWP, Remote - *WordPress Engineer*

- Utilize the Larva design system to layout WordPress theme templates for a WordPress VIP client.
- Use the block editor and an off-the-shelf theme to quickly prototype a design for a WordPress VIP client.
- Modify the Google Web Stories plugin to accept proprietary image assets from a hosted image manager.
- Contribute to WordPress.org via code contributions.

February 2020 - November 2020

Stranger Studios, Remote - *Technical Support Engineer*

- Answer technical customer support tickets for the plugin Paid Memberships Pro.
- Contribute to the development of Paid Memberships Pro and its add-ons.
- Assist other team members with their support questions.

January 2019 - June 2019

Back4oDesign, Edmond, Oklahoma - *PHP Developer*

- Develop sites using WordPress and their in-house Javelin CMS system.
- Assist team members with their development and graphic design needs (basic Photoshop).

Reference: Chris Logan <chris@chrislogan.us> 405-240-7064

September 2014 - April 2018

BigWing, Oklahoma City - *Senior Web Developer*

- Provide back-end and front-end support in converting PSD designs to functional WordPress sites on various hosting environments.

- Troubleshoot common DevOp issues such as site downtime, plugin integration failures, and WordPress bugs and issues.
- Mentor junior front-end developers and assist them with back-end programming (API access, integrations, etc.).

November 2011 - October 2013

Metronet Norge AS, Oslo, Norway - *Senior Web Developer*

- Provide back-end development for a variety of custom-designed WordPress sites, including a popular Norwegian meal-delivery service.
- Assist front-end developers with back-end coding such as API access, background processes, and hosting issues.

Relevant Education

I graduated in 2004 with a Master of Science in Business from Texas A&M in Texarkana, Texas.

I graduated in 2003 with a Bachelor of Science in Electronics Engineering Technology from Devry University in Phoenix, Arizona.

Relevant Skills and Technology Experience

- WordPress
 - Advanced level
 - 15+ years of experience
 - WordPress Plugin downloads: <https://profiles.wordpress.org/ronalfy/>
 - GitHub Polished: <https://github.com/mediaron>
 - GitHub Personal: <https://github.com/ronalfy>
 - Gists: <https://gist.github.com/ronalfy>
- JavaScript
 - Intermediate level
 - 10+ years of experience working with mostly jQuery
 - Well versed in jQuery and React/Redux
 - Currently training with vanilla modern JavaScript
- PHP
 - Intermediate level
 - 10+ years of experience, but my training needs an upgrade
 - Currently training for modern PHP OOP practices and development
- CSS/SASS
 - Intermediate level
 - 10+ years of experience in CSS, but I'd like to get faster and better on the front-end
 - Currently training for modern CSS/SASS development
- MySQL/SQL databases
 - Intermediate level
 - I am well-versed in SQL and am learning data architecture in my spare time
- Regular Expressions
 - Intermediate level
 - I can write and read basic to advanced Regular Expressions
- Gulp
 - Intermediate level
 - One of my favorite build/bundle tools, although I prefer Grunt and Webpack for packaging and transpiling
 - Sample project Gulp file:
<https://github.com/MediaRon/wp-presenter-pro/blob/master/gulpfile.js>
- Webpack
 - Intermediate level

- I love how customizable Webpack is over other build tools and prefer to write my own rules
 - Sample project Webpack file:
<https://gist.github.com/ronalfy/9ff9132c6befcaafa7cac1d2b87bc1d0>
- Git
 - Intermediate level
 - I prefer using tools like GitKraken over CLI for most Git commands
- SSH/SFTP
 - Intermediate level
 - I can navigate just fine using an SSH GUI or command line for a raw SSH connection
- NPM/Node
 - Intermediate level
 - I use NPM all the time when working on React projects
 - I have yet to do any Node.JS back-end work
- NVM
 - Some experience with this when Node versions are a mismatch for projects.
- Composer
 - Basic level
 - I've integrated Composer into some projects, but as most of my development is WordPress-based, there is little need for Composer in most projects
- Yarn
 - No experience
 - I prefer NPM, but have been meaning to look at Yarn as its faster on initialization
- Docker
 - Limited experience
 - Some command line with Local by Flywheel
 - I prefer a LAMP stack with MAMP as my local development environment
 - I prefer NGINX hosting environments like WPE, ServeBolt, and Kinsta
